DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to a system of communications comprising a location-indicating code-responsive visual alert, classified in class 340, subclass 7.61.
 - II. Claims 14-15, drawn to a system of communications comprising a merchandise information display system (e.g., store price display system), classified in class 340, subclass 5.91.
 - III. Claims 16-19, drawn to a method of operating a mechanized store comprising control by data bearing records, classified in class 235, subclass 383.
 - IV. Claim 20, drawn to a data processing system performing an automated financial or business method, practice, or task comprising inventory management with itemization of parts, classified in class 705, subclass 29.

2. The inventions are distinct, each from the other because of the following reasons:

Invention II is related to Invention I as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, *and* (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In this case,

the combination as claimed does not require the particulars of the subcombination as claimed because a system in accordance with Invention II need not be capable of remotely causing the shelf label holder to illuminate under a predetermined condition. The subcombination has separate utility by itself (i.e., without any host controller).

Invention IV is related to each of Inventions I and II as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In this case, Inventions I and II each have separate utility from Invention IV, such as for use under manual control, as opposed to automated control by a computer program such as in Invention IV. See MPEP § 806.05(d).

Invention III is related to each of Inventions I, II, and IV as process and apparatus for its practice. The inventions are distinct if it can be shown that *either*: (1) the process as claimed can be practiced by another, materially different apparatus, or by hand, *or* (2) the apparatus as claimed can be used to practice another, materially different process. (MPEP § 806.05(e)). In this case, with regard to Inventions I and II, each apparatus as claimed can be used to practice another, materially different process, such as any process involving no planogram data. With regard to Invention IV, the apparatus as claimed can be used to practice another, materially different process or by hand, such as by hand.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was placed to Mr. Phillip E. Miller (Reg. N^o 46,060), attorney for applicant, on September 3, 2004, to discuss an oral election to the above restriction requirement, but the call did not result in an election being made.

5. Applicant is advised that the reply to this requirement, to be complete, *must* include an election of the invention to be examined, even if the requirement be traversed (37 CFR 1.143).

Conclusion

6. Any inquiry concerning this communication, or earlier communications, should be directed to the examiner, **Jerry O'Connor**, whose telephone number is **(703) 305-1525**, and whose facsimile number is **(703) 746-3976**.

The examiner can normally be reached weekdays from 9:30 to 6:00.

Inquiries of a general nature or simply relating to the status of the application should be directed to the receptionist, whose telephone number is **(703) 308-1113**.

If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Mr. Robert Olszewski, can be reached at **(703) 308-5183**.

Official replies to this Office action may be submitted by any *one* of fax, mail, or hand delivery. **Faxed replies are preferred and should be directed to (703) 872-9306** (fax-back auto-reply receipt service provided). Mailed replies should be addressed to "Commissioner for Patents, PO Box 1450, Alexandria, VA 22313-1450." Hand delivered replies should be left with the receptionist on the seventh floor of Crystal Park Five, 2451 Crystal Dr, Arlington, VA 22202.
